## PhiLaser method with Sule Ozlem

Not so long ago, my life changed for the better just because of one decision that I made. So when I decided to join the PHI family, my journey to the top began. I have worked hard to reach my goal, and I'm finally there, but I still take my part in learning and passing the knowledge to others.

I have always believed that if you want to rise, you have to give first, and I gave my persistence, desire, and will to perfect myself on many levels. I am now a PHI master in these techniques:

- PhiBrows
- PhiBright
- Microneedling
- Philon
- PhiLings
- SaikoBrows
- PhiHenna
- PhiLaser
- PowderBrows

The list is long, and so was my dedication. Now I don't just do these treatments, but I can also teach you how to do them, how to do a business in this industry, and finally, I can be the initiative for the change you are longing for.

## PhiLaser technique THAT WILL RULE THE WORLD

This special method is based on a unique machine that produces laser light that selectively removes pigment from the skin. It can be used for removing unwanted tattoos, old or badly done eyebrow treatments, or anything that is done with pigment coloring of skin.

PhiLaser can also be used for removing hyperpigmentation, skin discoloration, and age spots and for carbon peeling. Carbon peeling is a special method that can rejuvenate skin, clean pores, and remove imperfections.

This technique is easily applicable to any type of skin with few adjustments.

## Education time

HOW DOES IT LOOK:

PhiLaser basic course includes 1 day of live training with theoretical and practical parts and 6 months of learning through the Craft Master mobile application with professional monitoring.

CRAFT  MASTER

## Theoretical part

The theoretical part covers all the topics the students have to get familiar with in order to perform treatments successfully:

- PhiLaser introduction
- Examination of the patient
- What is involved in the removal process
- How to properly set up and use the PhiLaser
- How to prepare yourself, your clients, and the space for the treatment
- Proper after-care
- 4 treatments can be performed
- Contraindications

## Practical part

The practical part of the course includes removing a tattoo on live models. During this part, students are monitored by a Master who is open to all their questions and provides advice on different topics.

After receiving the certificate of successfully completed technique, you will automatically be listed on our Phi-Academy World Map so that your potential customer can find you easily. You can find the already existing artists of our Academy on the PhiAcademy map:
